

# Hanuman Sahani (Flutter and Laravel Developer)

**Detail-oriented Flutter and Laravel Developer** with extensive experience in building high-performance, scalable applications for both mobile and web platforms. Proficient in using Flutter for cross-platform mobile development, creating responsive and intuitive UIs, and integrating complex features like real-time data synchronization and push notifications. Adept in Laravel for server-side development, including designing secure APIs, managing database interactions, and implementing robust authentication systems. With a strong foundation in both front-end and back-end development, I excel at delivering cohesive, user-centered solutions while optimizing performance and ensuring data security. Committed to continuous learning and staying abreast of the latest technologies, I am dedicated to driving innovation and contributing to successful project outcomes.

## Experience

<b>MOBILOITTE Technology India PVT LTD</b>	01/01/2023 to 22/06/2023
Flutter Development Intern Delhi	
	
<b>Website:</b> <a href="https://www.mobiloitte.com">https://www.mobiloitte.com</a>	

- Learning and working with Flutter ,Dart , Firebase to develop mobile application - Assisting in designing , developing and maintaining the codebase of various projects .
- Collaborating with the development team to design and implement new features, enhancing user experience and functionality.

<b>Comptech Training &amp; Technology PVT LTD</b>	24/06/2023 to 01/01/2024
Senior Flutter Developer	Delhi
<b>WebSite:</b> <a href="https://www.comptechdigital.in/">https://www.comptechdigital.in/</a>	

- Developed and maintained mobile applications using Flutter and Dart.
- Worked closely with designers and backend developers to create seamless user experiences.
- Participated in code reviews and provided feedback to improve code quality and maintainability.
- Collaborating with the development team to design and implement new features, enhancing user experience and functionality.

<b>Akc webtech PVT LTD</b>	01/01/2024 to present
Senior Flutter and Laravel Developer	Delhi
<b>Website:</b> <a href="https://www.akcworld.in/">https://www.akcworld.in/</a>	

- Develop, maintain, and optimize mobile applications using **Flutter** for iOS and Android.
- Integrate and maintain backend systems using **Laravel** to support mobile applications.
- **Monitor and manage app updates on App Store Connect**, including version control, metadata updates, and release scheduling.
- Troubleshoot and resolve issues related to app submissions, rejections, and updates on **App Store Connect**.
- Work closely with the design, QA, and product teams to ensure seamless app delivery and updates.
- Manage API integrations between mobile apps and the Laravel backend.
- Monitor app performance and provide timely fixes or improvements.

Education

B.tech	KIPM College Of Engineering & Technology ( Computer Science & Engineering )	2023	Bachelor of Technology
12 <sup>th</sup>	GP Maurya Inter College Vijauva Rithuakhor Gorakhpur (UPBORAD)	2019	Intermediate
10 <sup>th</sup>	GP Maurya Inter College Vijauva Rithuakhor Gorakhpur (UPBOARD)	2017	High School

Projects

Maruhan Japan Bank app

- (A Japan bank flutter app) My role in this project completing only UI Part of this flutter Project.

Utsav Fashion Ecommerce app

- (A Ecommerce Flutter App) My role in this project is integration of rest API. Using Bloc State management and developing all UI part of project.

SrankBazzar Business Listing App

- (A Business Listing Flutter App) My role in this project is developing. Ui Part and PHP Api Integration Using Bloc State management. In this project we are filtering business according nearest location and showing it.
- In this Project we are Using Geolocator to show location and for Notification to Firebase push notification.

BlueBarn Blog App

- Implemented dynamic content fetching and real-time updates via REST APIs.
- Built a responsive UI, supporting light themes and offline functionality.
- Added advanced search/filter, push notifications, and optimized app performance.
- Ensured code quality with unit/widget tests and used Git for version control.
- Connected the app to external APIs for fetching news data and blogging content. Handled JSON parsing, error handling, and pagination efficiently.

PayRoll Web App

- Built responsive, mobile-friendly UI with Blade templates, Bootstrap/Material Design.
- Developed role-specific dashboards and self-service portals for employees to access payroll, attendance, and leave details.
- Integrated charts for payroll trends, tax breakdowns, and attendance analysis .
- Implemented automated salary calculations, taxes, and deductions, integrating attendance and leave data.
- Developed RESTful APIs with JWT authentication for third-party integrations (e.g., HR and attendance systems).
- Built role-based access control and ensured secure data management with encrypted storage and CSRF protection.

STM+

- "STM," a payroll management app using Flutter, ensuring seamless performance and consistent UI on both Android and iOS devices.
- Designed and implemented custom widgets for payroll-related features, ensuring an intuitive and engaging user experience.
- Built adaptive and responsive layouts to accommodate various screen sizes and orientations, enhancing usability across different devices.
- Created dynamic forms for adding and updating employee information, processing leave requests, and handling attendance logs with real-time validation and feedback.
- Implemented push notifications to alert users about payroll updates, payment schedules, and leave approvals using Firebase Cloud Messaging (FCM).
- Connected the app to a backend server Laravel via RESTful APIs to handle payroll calculations, employee data, and attendance records.
